

1652

Attorney's Docket No.: 06497-013002

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant : James C. Liao

Art Unit : 1652

Serial No. : 10/048,186

Examiner : Unknown

Filed : June 19, 2002

Title : ENGINEERING OF METABOLIC CONTROL

RECEIVED

JUL 23 2003

Commissioner for Patents

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Applicant discloses the references listed on the attached form PTO-1449. Enclosed is a copy of a search report dated June 6, 2003, issued in a counterpart international application EP 00950804.5.

This statement is being filed before the receipt of a first Office action on the merits.

Please apply any charges or credits to Deposit Account No. 06-1050.

Respectfully submitted,

Date: _____

COMMUNICATION

The European Patent Office herewith transmits the supplementary partial European search report under Rule 46(1) EPC relating to the above mentioned European patent application.

Copies of the documents cited in the search report are enclosed.

The applicant's attention is drawn to the following:

The search Division informs the applicant that if the European search report is also to cover inventions other than the invention first mentioned in the claims, a further search fee must be paid for each of these inventions, within ONE MONTH after notification of this communication.

If the application has been filed up to 30 June 1999, the search fee in force before 01 July 1999 (EUR 859,-) or the equivalent applicable on the date of payment is payable.

This applies also to the search fees requested under Rule 46(1) EPC.

See also OJ EPO 06/1999, 405.

- ☐ The abstract was modified by the Search Division and the definitive text is attached to the present communication.
- ☒ Additional set(s) of copies of the documents cited in the European search report is (are) enclosed as well.

**LACK OF UNITY OF INVENTION
SHEET B**

Application Number
EP 00 95 0804

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. Claims: 1-8,24 (complete), 17-20,30-34 (partially)

A bacterial host cell comprising a nucleic acid comprising a promoter which is controlled by a response regulator protein, the host being genetically modified such that said promoter is regulated by acetyl phosphate in the absence of nitrogen starvation, and subject-matter related thereto.

2. Claims: 9,14-16,21 (complete), 10-13,17-20,27-29, 35 (partially)

A host cell comprising a first expression cassette comprising a promoter which is controlled by acetyl phosphate in the absence of nitrogen starvation and a nucleic acid sequence encoding a first enzyme required for biosynthesis of a heterologous metabolite, as well as nucleic acid sequences encoding other enzymes required for the synthesis of said metabolite, and subject-matter related thereto.

3. Claim : 22 (complete)

A method of producing heterologous isoprenoids in a host cell by overexpressing phosphoenolpyruvate synthase and biosynthetic enzymes required for the synthesis of the isoprenoids.

4. Claim : 23 (complete)

A method of producing lycopene in a host cell by expressing a heterologous 1-deoxy-D-xylulose 5-phosphate synthase, geranylgeranyl diphosphate synthase, phytoene synthase and phytoene desaturase.

5. Claims: 25-26 (complete), 27-35 (partially)

A nucleic acid sequence comprising a promoter and a sequence encoding an enzyme required for the production of a first metabolite, said promoter being regulated by a second metabolite, the concentration of which is indicative of availability of a precursor for the synthesis of the first metabolite, and subject-matter related thereto.
